ABOUT THE PROJECT

This project provides insights into the characteristics of unicorn companies (companies whose values are over 1 billion dollars). In particular, it will find the answers to the following questions:

1. Which unicorn companies have had the biggest return on investment?
2. How long does it usually take for a company to become a unicorn?
3. Which industries have the most unicorns?
4. Which countries have the most unicorns?
5. Which investors have funded the most unicorns?

ABOUT THE DATA

- The dataset used in this analysis contains records of 1074 unicorn companies obtained from Maven Analytics' official website.
- The sample size reduces to 1060 due to the lack of funding and inaccurate information on the year companies are found.
- Microsoft Excel was used for the initial setup before importing to SQL server.

DATA CLEANING

In this project, we mainly used SQL for both data cleaning and exploration.

Data cleaning steps include:

- Check for duplicates
- Rename columns where necessary
- Standardize date format
- Drop rows with errors
- Reformat currency values (e.g., \$2M => 2,000,000)
- Generate new columns based on existing column values Delete unused columns

DATA EXPLORATION

SQL skills used:

- Common Table Expressions (CTEs),
- Joins
- Windows Functions
- Aggregate Functions
- Data Types Conversion
- Relational operators

DATA EXPLORATION

1. Which unicorn companies have had the biggest return on investment (ROI)?

- This query output shows the top 10 companies with the biggest ROI. Zapier achieved the biggest ROI of 3999 percent. Dunam comes second with 125 percent ROI, and Work human is third with 110 percent ROI.
- Zapier's ROI is significantly high compared to other companies.
